

Vishwas Jha.

UI/UX Designer

New Delhi, India · +91 89288 79285 · vishwasjha13@gmail.com · <https://vishwas.my> · [linkedin.com/in/vishwas-jha](https://www.linkedin.com/in/vishwas-jha) · github.com/VishWas-13

SUMMARY

UI/UX designer who also ships the code. I design in Figma and build in React, so my designs are never theoretical. I've built documented, contrast-checked design systems across 40+ screen products, run the full flow from user research and wireframes to hi-fi prototypes, and I'm fluent in the Government of India UX4G design system and WCAG accessibility. Every screen I hand off is one I could build myself.

SKILLS

UI/UX & Product	Figma, Adobe XD, User research & flows, Wireframing & prototyping, Design systems & tokens, Component libraries, Interaction & motion design, Accessibility (WCAG), GOI UX4G design system, Responsive / mobile-first
Design Tools	Figma, Adobe XD, Photoshop, Illustrator, InDesign, Affinity, Canva, Google Stitch
Frontend (I build my designs)	React, Next.js, React Native, Tailwind CSS, shadcn/ui, Ant Design, Framer Motion, GSAP
Systems	Design tokens (light/dark), Component libraries, Contrast checking, Responsive / mobile-first, Motion & interaction design

EXPERIENCE

Software Engineer II, Product Designer & Developer

Mar 2026 – Present

Identium Tech Solutions · New Delhi

- Sole designer for the entire product line: user flows, wireframes, hi-fi prototypes and reusable design systems in Figma, then built in React, Next.js and React Native.
- Designed data-dense product interfaces (40+ screen dashboards, real-time tables, data-viz reports) on documented design systems with light/dark theming and contrast checks (Ant Design, Tailwind, Recharts).
- Explored complete products in multiple design languages before build, e.g. CX Flow Pro in both an iOS-premium and a 'Nothing'-inspired industrial system, to separate structural decisions from decoration.
- Built bespoke design systems per product: RaceFlow Pro's domain-token system with ~16 hand-authored animations and full dark mode across 30+ screens, and documented light/dark systems for data-dense logistics tools like Identium Tracking.
- Owned accessibility (WCAG) and responsive behaviour end to end, with the GOI UX4G design system for government-facing work.

UI/UX & Graphic Designer, Frontend Developer

Sep 2024 – Feb 2026

Freelance · New Delhi

- Designed a modern, responsive UI and visual system for Clothsiva's e-commerce platform, with high-fidelity Figma wireframes focused on clarity and conversion.
- Delivered end-to-end design and frontend for multiple small-business clients, from wireframes to shipped, responsive interfaces.
- Maintained consistent brand identity across posters, social creatives and campaign graphics for Sui Generis.

Software Engineer / Team Lead

Jul 2022 – May 2024

LTIMindtree · Navi Mumbai

- Designed and built frontend interfaces and UI/UX for multiple internal web applications for client Rev Group, improving usability and daily workflows.
- Produced data-driven presentations and graphic assets for Rev Group stakeholders.
- Led a 9-member ERP support team; primary technical liaison for US clients.

PROJECTS

CX Flow Pro: dual design languages: Designed one product in two complete visual systems (iOS-premium and industrial 'Nothing'-inspired) before building the published Android app; a case study in structure vs. decoration.

RaceFlow Pro: RFID race-timing platform (web + desktop). Custom design system with domain tokens, ~16 hand-authored animations, glassmorphism and dark mode. 30+ screens spanning live tracking, leaderboards, an embeddable widget and PDF certificates. React, TypeScript, shadcn/ui, Recharts, Electron.

Identium Tracking: reusable-asset logistics platform moving boxes, trolleys and pallets between warehouses, hubs and client sites with a self-writing paper trail. Auto-generated GRN dispatch (In-Transit → Available), reconciliation to close the loop, role-based auth and full audit history. React, Ant Design, Node, MySQL.

Identium UHF Desktop Reader: Electron desktop app for the UHF Desktop Reader 103 — live inventory, single and bulk tag writing with Excel current-to-new mapping, and full reader configuration — built on a pure-Node reimplement of the vendor's NRP binary protocol (no vendor DLL). Shipping at v1.1.3. Electron, React, Tailwind.

Personal portfolio: WebGL/3D interactive site with a custom GLSL particle shader hero, a physics playground (Rapier), the bespoke 'SIGNAL' design system, generative per-project artwork and GSAP/Framer Motion choreography. Next.js 15, React 19, Three.js/R3F, Tailwind v4.

EDUCATION

Master of Computer Applications (MCA)

Indira Gandhi National Open University
2026 – Present · Pursuing

Bachelor of Computer Applications (BCA)

Vivekananda Institute of Professional Studies, GGSIPU
2019 – 2022 · GPA 9.02 / 10
